

Service Description

Who We Are

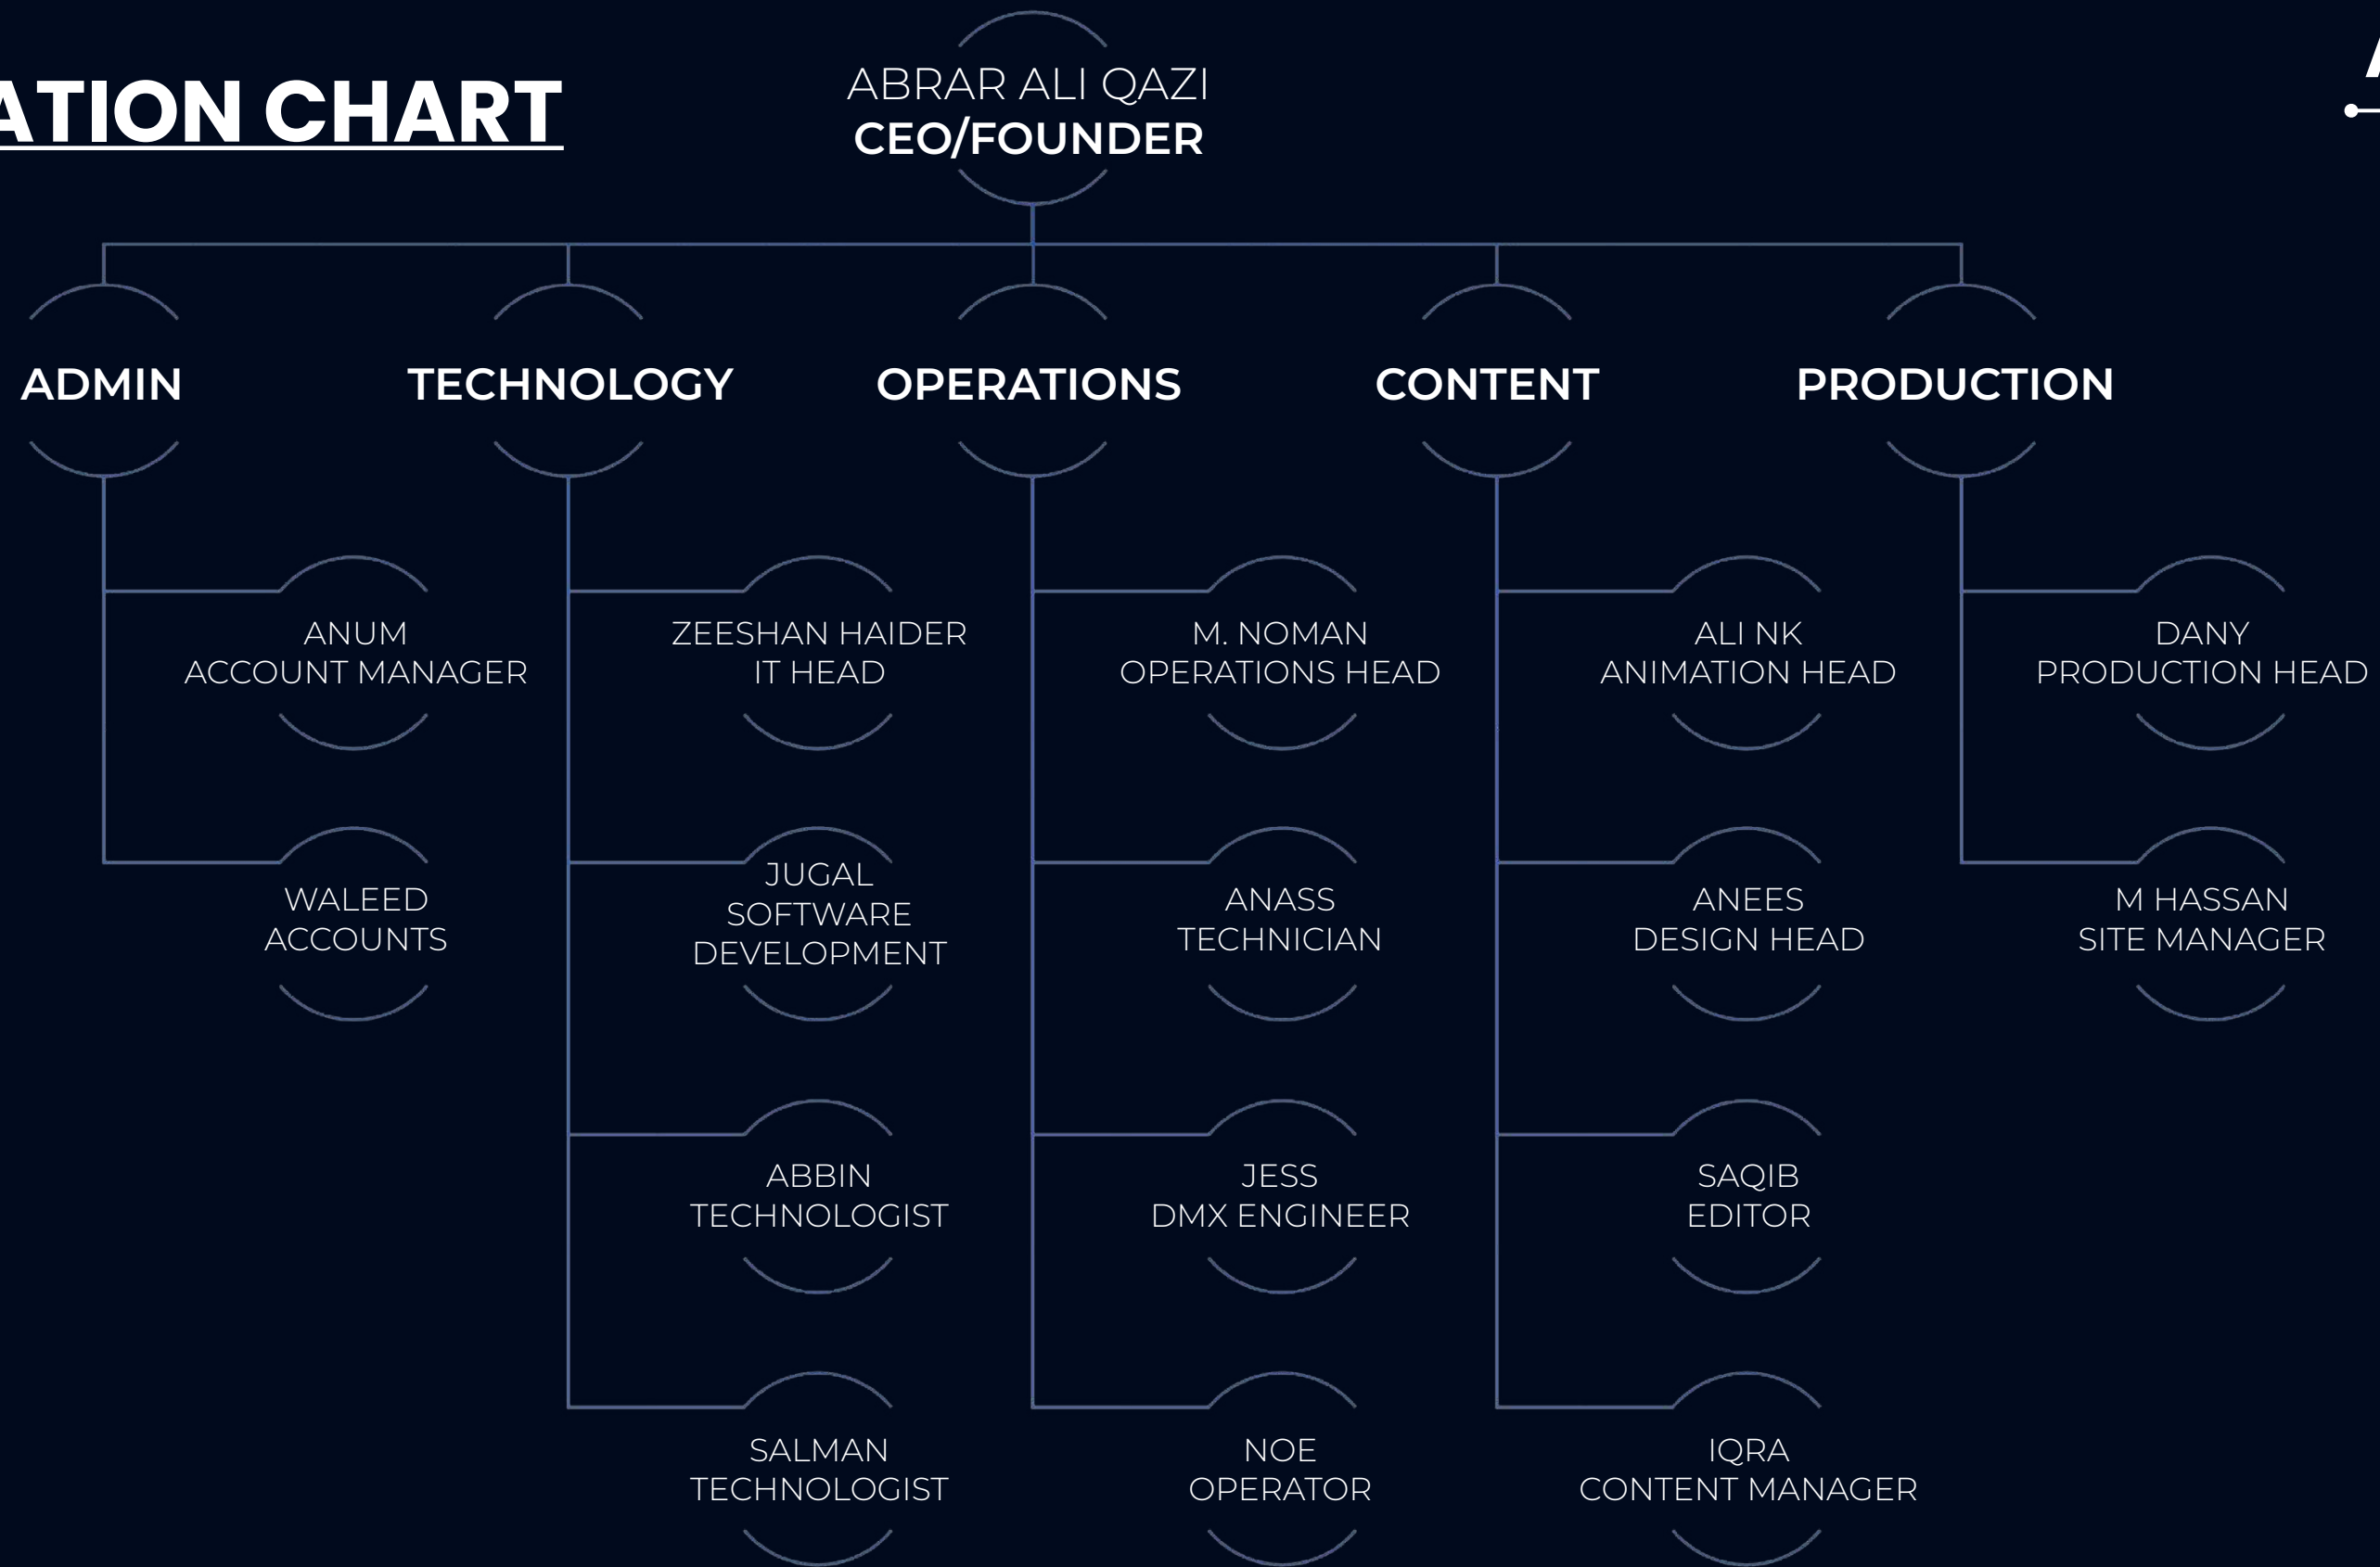

About Us

ABR TECH is a studio, focused on producing interdisciplinary experiences around art, design and technology. It builds a bridge between the digital and the physical reality, while examining the relationship of technology with art and design. It produces tools, designs and stories in which the connection between the human and technology reflects in many ways.

Our immersive technology experts consist of 3D modelers, animators, storytellers, illustrators, artists, developers, designers, and creative technologists.

ARTIFICIAL INTELLIGENCE

ARTIFICIAL INTELLIGENCE

Multi-lingual AI Host

our revolutionary 3D AI Chat GPT Virtual Host – seamlessly integrated into any display, transforming engagement! Equipped with ChatGPT's vast knowledge and customizable to your needs, it's a multilingual marvel. From English to Mandarin, Spanish to Arabic, it communicates effortlessly. Guiding visitors through registration, offering event guidelines, it enhances experience intuitively. Picture this: a visitor asks a question in their language, and our virtual host responds warmly. Say hello to limitless engagement with our 3D AI Chat GPT Virtual Host – breaking language barriers effortlessly!

Technology Specification: Interactive conversational Open AI Host

Display options: Holograms, Display units, LED screens

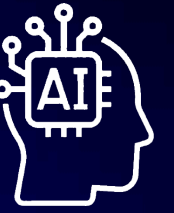

Input: Voice input, Text input, Touch

Character: Customizable

Languages: Multi lingual

ARTIFICIAL INTELLIGENCE

AI Anamorphic Host

Introducing our groundbreaking AI host, powered by Chat GPT, that not only answers your questions but also mirrors your movements as you navigate around! Imagine a dynamic display where the virtual head seamlessly follows your every step, creating an immersive experience like no other. With its mesmerizing anamorphic design, it appears as if the virtual head is emerging and receding from the screen, adding a touch of magic to your interactions. Whether you're strolling or stopping to inquire, our AI host remains attentive, ready to provide assistance with a flair.

Technology Specification: AI Anamorphic Face

Display options: Any LED Screen or display

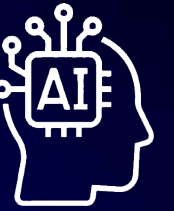

Input: Voice input, Text input, Touch

Character: Customizable

Languages: Multi lingual
